

# PIONEERS IN CONTROL SYSTEMS INTEGRATION FOR THE WATER AND WASTEWATER INDUSTRY

## WHO WE ARE

Since 1994, we have supplied hundreds of open-architecture control systems for the municipal water and wastewater treatment industry. Our steady growth and sterling reputation are driven by a targeted focus on system reliability, customer satisfaction, ease of use, and maintenance.

Perhaps what is more important is the passion our team has for every project that we have the opportunity to work on. From concept to completion and beyond, our team will treat your project like their own. We offer 24/7 service so you don't have to worry about a thing, no matter what time you need us. We provide state-of-the-art automation to manage and operate your water and wastewater systems at optimal efficiency, while reducing operating costs and minimizing liabilities.

## WHY MR SYSTEMS

### State of the Art Automation

We provide state-of-the-art automation to manage and operate your water and wastewater systems.

### Unparalleled Service

MR maintains unparalleled service throughout the design & implementation phases of every project.

### 24/7 Reliability

At MR Systems, control system integration means reliability you can count on, even while you sleep.

### Passionate Team Members

Our team has a passion for their work and it shines through in every project.

## OUR EXPERTISE

### CONTROL SYSTEM INTEGRATION

We design, install, and maintain instrumentation and control systems, supervisory control and data acquisition (SCADA) systems, remote telemetry systems, and security access and surveillance systems.

### TELEMETRY SYSTEMS

MR Systems has developed extensive expertise in designing, installing, and maintaining reliable telemetry systems for municipal water and wastewater utilities. MR helps maintain your system by performing periodic analysis of communications data and, if necessary, onsite inspections of the equipment.

### HIGH PERFORMANCE PROCESS VISUALIZATION

MR Systems pioneered the use of fully rendered 3-dimensional (3D) graphics displays for the water and wastewater industry and we are leading the movement toward the development of "High Performance Process Visualization" tools.

### FIBER OPTICS DESIGN, INSTALLATION, TERMINATION, & TESTING

Whether you require the integration of a few components or need a complete network designed from scratch, MR Systems can provide you with a cost-effective solution that incorporates your immediate need and long-term objectives.

### VIDEO SURVEILLANCE & ACCESS CONTROL SYSTEMS

MR Systems can provide your facility with surveillance and access control systems that precisely match your needs. With support for a wide range of industry-leading cameras, encoders, CCTV equipment, and access control hardware, our systems can be easily expanded or modified to adapt to future requirements.

### SERVICE & MAINTENANCE AGREEMENTS

We know that downtime is a costly enemy so we respond to your needs fast! Our comprehensive agreements to ensure you never have to worry about downtime again. They increase productivity, save you money, and we can tailor a plan for you specifically.

### TRAINING

We offer classes that provide hands-on training in the areas of: HMI Programming, PLC Programming, Instrument Calibration and Maintenance, Fiber Optics Terminations and Troubleshooting, and Radio Telemetry System Maintenance. Our training classes are specific to the water and wastewater industry.
